

Project Summary

After two years of hard work and extensive public consultation, the Township of Killaloe, Hagarty and Richards has made its decision regarding a Preferred Solution in managing solid waste for the next 20 years.

The Preferred Solution for the Township's Municipal Solid Waste Management Strategic Plan is based on a waste exportation approach, whereby waste generated within the municipality will be transferred to an approved waste management facility outside of Township borders. Remaining landfill space at the Township's Killaloe and Red Rock waste sites will be utilized for disposal of inert construction, demolition and bulky waste materials, all of which is planned to be processed to optimize remaining capacity.

Through several public meetings and municipal-wide questionnaires, ratepayers have given their support to the Township process in working through the project, with careful consideration of the alternatives, and active participation in public meetings. With the ratepayers input carefully considered, the Township's Council has unanimously decided on exporting their waste to an approved disposal facility – currently the Lafleche Environmental waste management site in Moose Creek, Ontario.

KHR's Council has not taken this project lightly – from the very outset of the project in 2009, Council insisted that the long-term waste plan would be developed with the public, not simply presenting a Council-based solution to them. Mayor Janice Visneskie praised, "Council has been very diligent in working through all the technical studies and consultation with our ratepayers to carefully come to this important decision for the municipality. We want to thank the public for working with us to come to a solution that best serves the municipality as a whole, balancing cost and environmental factors important to all".

On Sunday, November 27, 2011 the Township is hosting an information meeting in Round Lake Centre, to present some of the details related to the Preferred Solution, and what next steps are planned for permitting, approvals and construction in the spring of 2012. The Township's webpage link holds all the pertinent information to date at:
